- English

## HOBBIES

- Sketching
- Coding

## ABOUT ME

As a student with a passion for web development, I am seeking an entry-level position in a tech company where I can utilize my skills and knowledge to develop innovative and user-friendly web applications.

## WORK EXPERIENCE

MERN stack developer  
**Intern at zappian**  
05-sep-2023 to present

## PROJECTS

- CredMudra**  
**Node.js, React.js**  
I implemented server-side rendering for the "Credmudra" React website, significantly improving performance and user experience. Additionally, I optimized SEO by dynamically setting title, keywords, and descriptions from the server side.
- CRM for credmudra**  
**React.js**  
I implemented a CRM website for a leading "credmudra". My contributions include secure user authentication, intuitive dashboards, and information modules. The project resulted in enhanced operational efficiency and heightened employee satisfaction. This project underscores my proficiency in delivering scalable and secure solution
- Chatbot**  
**React.js**  
I implemented a conversational UI chatbot for loan matchmaking. Successfully integrated comprehensive form validations, ensuring a seamless and error-free user experience
- QnAI**  
**Node.js, openai**  
i am working extensively on the backend of QnAI. I created diverse APIs utilizing the OpenAI module, enhancing the platform's natural language processing capabilities. Additionally, I established connections with various databases, including ClickHouse and MySQL, optimizing data storage and retrieval processes. My role contributed to the robustness and efficiency of the QnAI backend, showcasing my expertise in API development and database integration
- QnAI**  
**React.js**  
Qnai is a technology-driven business intelligence tool provided for analyzing and visualizing raw data to present actionable information. It is data visualization, and best practices that help an organization to make data-driven decisions.

# PROJECTS

## CMS for credmudra

### **Node.js**

I crafted a secure Content Management System (CMS) backend for Credmudra. Implemented JWT token authentication to ensure streamlined and secure content management.

## Gouri Saini(Portfolio site)

### **React.js**

Gouri Saini website is clean and concise. This web developer portfolio consists of four sections – the homepage with his bio, a dedicated project page, and a contact page and a resume page having a simple design, it is intuitive and easy to use.

## WhatsApp Web Clone

### **React.js,Material-Ui,Node.js,Express.js,MongoDB,Socket.IO**

The WhatsApp Web Clone is a project that seeks to recreate the functionality and user experience of the original WhatsApp Web application. This clone aims to provide users with the ability to access and use WhatsApp directly from their web browsers, just like the original platform

## Career Crafts

### **Node.js, MongoDB, HTML, CSS, Bootstrap, JavaScript**

Developed a web application that will auto-generate a nice and properly formatted Resume from the information filled up in a form. The resume is downloadable in PDF format. Also, the user can log in again to access the previous resume that he had made.
