Backend Development   Node.js

Version Control   Github, slack, jira, Postman, Dbeaver

EXPERIENCE

MERN stack developer intern   Sep '23 — Mar '24
Zappian Fintech

- During internships, I successfully implemented innovative solutions, emphasizing my commitment to delivering high-quality results. With a passion for continuous learning and adaptability, I bring a fresh perspective and strong work ethic to contribute effectively to Zappian Fintech

PROJECTS

CredMudra (Node.js, React.js) Link

- I implemented server-side rendering for the "Credmudra" React website, significantly improving performance and user experience. Additionally, I optimized SEO by dynamically setting title, keywords, and descriptions from the server side.

CRM for Credmudra (React.js)

- I implemented a CRM website for a leading "credmudra". My contributions include secure user authentication, intuitive dashboards, and information modules. The project resulted in enhanced operational efficiency and heightened employee satisfaction. This project underscores my proficiency in delivering scalable and secure solution

QnAI (Node.js, openai, React.js)

- I am working extensively on the backend of QnAI. I created diverse APIs utilizing the OpenAI module, enhancing the platform's natural language processing capabilities. Additionally, I established connections with various databases, including ClickHouse and MySQL, optimizing data storage and retrieval processes. My role contributed to the robustness and efficiency of the QnAI backend, showcasing my expertise in API development and database integration. Qnai is a technology-driven business intelligence tool provided for analyzing and visualizing raw data to present actionable information. It is data visualization and best practices that help an organization make data-driven decisions.

Chatbot (React.js)

- I implemented a conversational UI chatbot for loan matchmaking. Successfully integrated comprehensive form validations, ensuring a seamless and error-free user experience

CMS for credmudra (Node.js)

- I crafted a secure Content Management System (CMS) backend for Credmudra. Implemented JWT token authentication to ensure streamlined and secure content management.

Gouri Saini(Portfolio site) Link

- Gouri Saini website is clean and concise. This web developer portfolio consists of four sections – the homepage with his bio, a dedicated project page, and a contact page and a resume page having a simple design, it is intuitive and easy to use.

WhatsApp Web Clone (React.js,Material-Ui,Node.js,Express.js,MongoDB,Socket.IO)

- The WhatsApp Web Clone is a project that seeks to recreate the functionality and user experience of the original WhatsApp Web application. This clone aims to provide users with the ability to access and use WhatsApp directly from their web browsers, just like the original platform
